

# Attention for attractions considering serving food

the 91st May Festival Standing Committee

---

Attractions serving food should note the following rules when determining the menu. Rules on cooking methods, cooking equipment and ingredients will be further explained on the 2nd Information Session. Foods not listed below may also be prohibited, if the health center suggests there is hygienic risk. Also stricter regulations might be imposed due to the recent diversification of food and drink served and the increase of cases with problems with food hygiene. We appreciate your understanding and cooperation. If you have any questions, please feel free to contact us via "Inquiry" on the Web System.
